CONSIDERATIONS

Early cloud adoption after decades of working in IT

Migrating on-prem Exchange to Microsoft 365

Azure tenancy migration for two school organisations

Replacing Boomi with an Enterprise Grade Azure Function

10:00

THE PROBLEM

SharePoint (SPFx) calling a third-party Boomi EndPoint (30,000 calls per month).

Cost

Performance

Observability

10:00

THE GOAL

Looming Deadline

Reliable Solution

Economically Viable

Observability

10:00

OPTIONS CONSIDERED

- Keep Boomi EndPoint (not ideal)
- Power Platform (🥫 significant reliability concerns)
- **Azure Function App** 👍

10:00

WHY AZURE FUNCTIONS?

- Lightweight HTTP endpoint
- Auto-scales with demand
- Minimal operational overhead

10:00

WHY AZURE FUNCTIONS?

ENTERPRISE GRADE

10:00

TARGET ARCHITECTURE

SharePoint

Azure Function

Boomi API

10:00

TECHNICAL LEADERSHIP

- Evaluated and proposed the preferred option
- Presented trade-offs to architects & dev leads
- Aligned with security, networking & governance
- Defined a reusable integration pattern

LESSONS LEARNED

✓ Decoupling improves resilience

✓ Observability must be designed-in

✓ Clear ownership accelerates delivery

10:00

SUMMARY

✓ Azure Function as a secure, scalable integration layer

✓ Strong technical leadership and decision-making

✓ Effective collaboration across teams

✓ Reusable pattern for future cloud integrations
